

The EBA consults on draft amending technical standards on factors assessing the appropriateness of real estate risk weights

The EBA consults on draft amending technical standards on factors assessing the appropriateness of real estate risk weights News & Press 30 April 2025 The European Banking Authority (EBA) today launched a public consultation on its draft amending Regulatory Technical Standards (RTS) on the types of factors to be considered by national authorities in assessing the appropriateness of real estate risk weights. This review is driven by the revised Capital Requirements Regulation (CRR 3), which confers a new mandate onto the EBA.

The EBA issues criteria to determine when Crypto Assets Service Providers have to appoint a central contact point to help fight financial crime

The EBA issues criteria to determine when Crypto Assets Service Providers have to appoint a central contact point to help fight financial crime Press Release 25 April 2025 The European Banking Authority (EBA) today published new draft Regulatory Technical Standards (RTS) that define when crypto-asset service providers (CASPs) have to appoint a central contact point. A

central contact point can be an important tool in the fight against financial crime. CASPs established in one EU Member State can provide services in another EU Member State. In some cases, where they have a local 'establishment', for example a crypto ATM, they must comply with local anti-money laundering and countering the financing of terrorism (AML/CFT) obligations as well as those that apply in the home Member State.

The EBA publishes key indicators on climate risk in the EU/EEA banking sector

The EBA publishes key indicators on climate risk in the EU/EEA banking sector Press Release 25 April 2025 The European Banking Authority (EBA) today released an ESG dashboard that establishes a broader ESG risks monitoring framework and allows centralised access to comparable climate risk indicators. This dashboard provides benchmarks and enhances the assessment and monitoring of transition and physical climate-related risk across the EU/EEA banking sector. It is based on the information disclosed by banks as part of their Pillar 3 ESG disclosures. This dashboard covers climate risk, both from a transition and a physical perspective.
